SUMMARY

AWS Certified Cloud Practitioner shipping full-stack web products on TypeScript, React, Next.js, Node.js, and Postgres — containerized, rate-limited, and deployed via Vercel and GitHub Actions. Permanent Arch Linux environment, terminal-first workflows. Target: DevOps / DevSecOps and full-stack engineering roles where the test of done is whether the thing holds under real load.

TECHNICAL SKILLS

Ships every day	TypeScript · React · Next.js · Node.js · Tailwind CSS · HTML/CSS · Git & GitHub · Vercel · Linux (Arch) · Bash/Shell · Neovim
Used in products I've shipped	PostgreSQL · Supabase · Redis/Upstash · Paddle Payments · M-Pesa STK Push · JWT Auth · GitHub Actions · Python · Flask
Know my way around	AWS · Docker · C · WebAssembly · Android

EXPERIENCE

Freelance Software & Systems Developer Self-employed · Nairobi, Kenya	2025 – Present
- Build and ship custom websites, developer tools, and a paid-product pipeline — Paddle checkout, webhook license minting, and gated repo download — end-to-end in production. - Design CI/CD pipelines with Vercel and GitHub Actions; containerize applications for repeatable deploys. - Configure multi-boot Linux server and desktop systems, including GRUB and custom shell environments.	

Steward Mirror of Hope CBO · Nairobi, Kenya	Dec 2020 – 2025
- Operational support, inventory management, and logistics coordination for a community-based organisation. - Trained and onboarded new staff on procedural workflows, reducing operational error rates.	

PROJECTS

DevSecOps Starter — Next.js · TypeScript · Upstash · Paddle · GitHub Actions · Vercel
License-gated boilerplate with a real sold-online flow: Paddle checkout → webhook mints license key on transaction.completed → /success gates private repo download. Upstash rate limiting, edge RBAC, PBKDF2 auth — verified end-to-end with a sandbox payment.
BankUi — Next.js · React 19 · TypeScript · M-Pesa
High-fidelity mobile banking prototype: real-time KES/USD/BTC balance conversion, P2P transfers, M-Pesa STK Push simulation, FaceID auth flow.
Medimart — React 19 · Flask · PostgreSQL · JWT · M-Pesa STK Push
Full-stack medical-supplies e-commerce with real M-Pesa STK Push payments, JWT auth, product CRUD, and an AI chatbot (React 19 front, Flask REST back).
JSON to Zustand — TypeScript · React — tool.fidelco.dev
Free client-side tool that generates a typed Zustand store from pasted JSON; top-of-funnel for the paid DevSecOps Starter product.
ArtVision — C · WebAssembly · JSON-LD · Docker
Zero-dependency static art gallery; C image filters compiled to WebAssembly for real-time client-side effects, WebP conversion, JSON-LD schema — 320px to 4K responsive, containerized deploy.
Dotfiles — Arch Linux · Hyprland · Neovim/LazyVim · Tmux · Zsh
Dev environment as a bare git repo: 233+ tracked configs (Hyprland, Waybar, Kitty, Neovim, Starship, Tmux, Zsh), Catppuccin Mocha theme, custom ricesync CLI for one-command sync.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science The Co-operative University of Kenya
